# VOLTEK<sup>WS</sup>

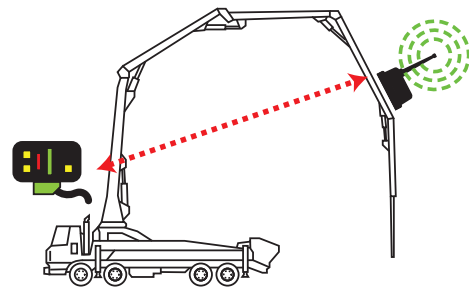

## Wireless Sensor for NS & Dualtek

The WS replaces the wire antenna used by the NS or Dualtek. The WS expands the capabilities of the NS and Dualtek providing endless options for almost any kind of equipment.

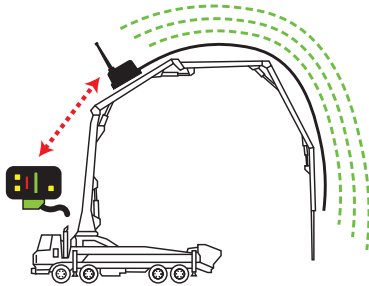

- Can be used for spot detection or with linear wire antenna for increased detection range
- Works with up to seven other sensors for increased coverage
- Compatible with either NS or Dualtek
- 500'+ Transmission range (direct line of sight)
- 200+ Hours of operation between charges
- Solar panel supplements battery life
- Weatherproof enclosure
- Magnetic mount for quick installation
